## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see pages 2 and 3, filed June 20, 2006, with respect to claims 1 and 10 have been fully considered and are persuasive. The rejection of claims 1 and 10 has been withdrawn.

### ***Allowable Subject Matter***

2. **Claims 1-11 are allowed.**
3. The following is a statement of reasons for the indication of allowable subject matter:

**Regarding claim 1**, the main reason for indication of allowable subject matter is because the prior art fails to teach or reasonably suggest, in combination with the existing elements of the present claim, that the optical member is solid, such that a space between the convex mirror and the optical member is filled with a light-transmissive material.

**Regarding claim 2**, the main reason for indication of allowable subject matter is because the prior art fails to teach or reasonably suggest, in combination with the existing elements of the present claim, that the attenuation section is a hole formed in the optical member, and the hole contains an air layer therein having a different light transmittance from that of the optical member so that the second incident light is attenuated by crossing the hole.

**Regarding claim 10**, the main reason for indication of allowable subject matter is because the prior art fails to teach or reasonably suggest, in combination with the existing elements of the present claim, that the optical member is solid, such that a space between the convex mirror and the optical member is filled with a light-transmissive material.

**Regarding claim 11**, the main reason for indication of allowable subject matter is because the prior art fails to teach or reasonably suggest, in combination with the existing elements of the present claim, that the attenuation section is a hole formed in the optical member, and the hole contains an air layer therein having a different light transmittance from that of the optical member so that the second incident light is attenuated by crossing the hole.
